EDUCATION

B.Tech in Computer Science and Engineering, Bennett University, The Times Group

2022 – 2026

SKILLS

Technical Skills	JavaScript, TypeScript, C++, SQL, React.js, Node.js, Express.js, REST APIs, WebSockets, Socket.IO, MongoDB, SQL Server, MySQL
Soft Skills	Problem Solving, Ownership, Communication, Teamwork, Fast Learning, Client Requirement Understanding, Debugging Mindset
Tools and Concepts	Git, GitHub, Postman, VS Code, Chrome DevTools, Render, Vercel, Figma, Docker, Microservices, API Design, RBAC, SDLC, DBMS, Data Structures and Algorithms

EXPERIENCE

SDE Intern

Jul 2026 - Present

Enestock PVT limited

- Developed a React Native application to stream 4K 360° VR videos (1TB) using chunk-based delivery, reducing video startup time by 70% compared to full-file downloads.
- Optimized video playback by implementing buffering management and adaptive streaming, maintaining 95%+ playback success with minimal buffering across varying network conditions.
- Built a scalable SaaS-based eCommerce platform supporting 1,000+ products, integrating secure payment gateways, order management, inventory tracking, and user authentication, reducing checkout time by 35

Full Stack Developer Intern

Jan 2026 – Jun 2026

BWays Tecno Solutions

- Increased order completion rate by 30% by implementing a shortest-route algorithm and automatic order assignment workflow.
- Led the development of a fully automated order dispatch system, resulting in a 100% increase in order dispatch throughput.
- Developed a cloud-based printing system that automatically generated and assigned warehouse labels using printer IP addresses and printer ports.

Full Stack Developer Intern

Sep 2025 – Dec 2025

HKNA Pvt Solutions

- Improved feature delivery quality by developing and testing frontend and backend workflows across UI screens, API integrations, form validations, and database operations.
- Led debugging and verification for multiple application modules using Git-based workflows, repeated testing, and structured issue tracking to support stable releases.
- Improved application reliability by identifying integration issues, documenting bugs clearly, validating fixes, and reducing repeated issues before delivery.

PROJECTS

Kodikos – Real-Time Collaborative Code Editor. Built a real-time collaborative coding platform using React, Node.js, Socket.IO, and WebSockets with room-based editing, live preview, built-in chat, project publishing, and multi-user synchronization. Implemented WebSocket event flows for code updates, user presence, collaboration rooms, cursor behavior, and live state sharing across connected users. ([Live](#))

Built Settlers 3D, a real-time multiplayer strategy game supporting 3–4 player rooms using React, TypeScript, Three.js, Socket.IO, and MongoDB. Engineered a server-authoritative game engine covering resource distribution, trading, development cards, robber mechanics, road calculation, and victory conditions. Designed a deterministic board graph with 19 tiles, 54 vertices, and 72 edges. Developed the application as a type-safe monorepo with shared Zod schemas and socket contracts, supported by 54 unit and multi-client integration tests. ([Live](#))

LEADERSHIP

- Founded Kodikos and led a 5-member team to turn the idea into a deployed product, managing development, product decisions, collaboration workflows, and user feedback while growing the platform to active users.
